SKROPAR, Praskfurt	DATE VICES APPLE	
: Chief, KURIOF		-
: UPSWIED/CART/LCIMPROVE/Operations	RE: "43-3" — (CHECK "X" ONE) MARKED FOR INDEXING) ————
: Wildflift Operations	MAKKED FOK INDEXING Y NO INDEXING REQUIRED	
OURED NOTE	INDEXING CAN BE JUDGED	
	BY QUALIFIED HQ. DESK ONL	
(S)2014-36747, 8 September 1958		
2. The following additional conseats only.	ed as "low-lowel" in reference	
marks appropriately the extended the terminal line		
b. The BIS carbon methods which have fulles into the range of extremely goo	we have been able to identify d to endiours. From the descrip- this enthod. The combination	
are taken to safeguard the agent's identity	we have been able to identify of to endiours. From the descrip- this enthod. The exchination	
b. The fill carbon methods which have falled into the range of extremely goo tion provided, we have no way of evaluating of earbon by for sending and bleached sicre	we have been able to identify of to endiours. From the descrip- this enthod. The exchination	
b. The fill carbon methods which have falled into the range of extremely goo tion provided, we have no way of evaluating of earbon by for sending and bleached sicre	we have been able to identify of to endiours. From the descrip- this enthod. The exchination	
b. The fill carbon methods which have falled into the range of extremely goo tion provided, we have no way of evaluating of earbon by for sending and bleached sicre	we have been able to identify of to endiours. From the descrip- this enthod. The exchination	
b. The fill carbon methods which have fallen into the range of extremely good tion provided, we have no way of evaluating of earbon BV for sending and bleached sicre gively used by the fill.	we have been able to identify of to endiours. From the descrip- this enthod. The exchination	
b. The fill carbon methods which have fallen into the range of extremely good tion provided, we have no way of evaluating of earbon SV for sending and bleached sicre sively used by the fill.	we have been able to identify of to endiours. From the descrip- this enthod. The exchination	
b. The fill carbon methods which have falled into the range of extremely good tion provided, we have no way of evaluating of earbon by for sending and bleached sicre sively used by the fill. Enclosure: 1 As stated above	we have been able to identify of to endiours. From the descrip- this enthod. The exchination	
b. The fill carbon methods which have fallen into the range of extremely good tion provided, we have no way of evaluating of earbon SV for sending and bleached sicre sively used by the fill.	we have been able to identify of to endiours. From the descrip- this enthod. The exchination	
b. The fill carbon methods which have falled into the range of extremely good tion provided, we have no way of evaluating of earthon by for sending and bleached microstvely used by the fill. Enclosure: 1 As stated above 9 October 1958 Distribution	we have been able to identify of to endiours. From the descrip- this enthod. The exchination	
b. The fill carbon methods which have fallen into the range of extremely good tion provided, we have no way of evaluating of earthon for for sending and bleached aterostrally med by the fill. Enclosure: 1 As stated above 9 October 1955 Distribution 2 - COB. Marich w/enc	we have been able to identify of to endiours. From the descrip- this enthod. The exchination	
b. The fill carbon methods which have fallen into the range of extremely good tion provided, we have no way of evaluating of earthon fill for sending and bleached micro sively used by the fill. Enclosure: I has stated above 9 October 1955 Distribution 2 - COB, Marich w/encl	we have been able to identify of to endiours. From the descrip- this enthod. The exchination	
b. The fill carbon methods which have falled into the range of extremely good tion provided, we have no way of evaluating of carbon 50 for sending and bleached alors sively used by the fill. Enclosure: I has stated above 9 October 1955 Distribution 2 - COB, Manich w/enc/ 2 - COB, Garanny w/enc/ 1 - METOPAS, Frankfurt w/enc/	we have been able to identify of to endiours. From the descrip- this enthod. The exchination	
b. The RIS carbon methods which have falled into the range of extremely good from provided, we have no way of evaluating of eartheat W for sending and bleached alors sively used by the RIS. Enclosure: I As stated above 9 October 1958 Distribution 2 - COB, Manich w/enc/ 2 - COB, Manich w/enc/ 1 - MITCHES, Frankfurt w/enc/ 1 - RI w/enc/	we have been able to identify of to endiours. From the descrip- this enthod. The exchination	
b. The SIS carbon methods which have falled into the range of extremely good tion provided, we have no way of evaluating of earther 5% for sending and bleached alere sively used by the SIS. Enclosure: 1 As stated above Distribution 2 - COS, Manich w/encl 2 - COS, Garancy w/encl 1 - Ri w/encl 1 - Ri w/encl 1 - Ris / State w/encl 1 - Ris / SRB w/encl	we have been able to identify of to endiours. From the descrip- this enthod. The exchination	
b. The RIS carbon methods which have falled into the range of extremely good from provided, we have no way of evaluating of eartheat W for sending and bleached alors sively used by the RIS. Enclosure: I As stated above 9 October 1958 Distribution 2 - COB, Marich w/enc/ 2 - COB, Marich w/enc/ 1 - RI w/enc/ 1 - RI w/enc/ 1 - RISSERS w/enc/	we have been able to identify of to endiours. From the descrip- this enthod. The exchination	
in the agent's identity b. The fill carbon methods which have falled into the range of extremaly good time provided, we have no way of evaluating of carbon for for sending and bleached alore sively used by the fill. Enclosure: As stated above 9 October 1956 Distribution 2 - COS, Marich w/enc 2 - COS, Garrany w/enc 1 - MITCHAS, Frankfurt w/enc 1 - Ri w/enc 1 - TES/SHB w/enc 1 - TES/SHB w/enc 2 - TES/SHB w/enc 2 - TES/SHB w/enc 3 - TES/SHB w/enc 4 - TES/SHB w/enc 5 - TES/SHB w/enc 6 - TES/SHB w/enc	we have been able to identify d to exdicare. From the description dot for receiving messages is ex-	tou
b. The RIS carbon methods which have fallen into the range of extremaly good tion provided, we have no way of evaluating of carbon Si for sending and bleached alore sively med by the RIS. Enclosure: 1 As stated above 9 October 1956 Distribution 2 - COS, Manich w/enc/ 2 - COS, Garrany w/enc/ 1 - RI w/enc/	we have been able to identify it to sediogra. From the description dot for receiving seemenges is expected to the continuous seemenges and the continuous seemenges is expected to the continuous seemenges and the continuous seemenges are continuous seemenges.	ten
in the agent's identity b. The fill carbon methods which have falled into the range of extremaly good time provided, we have no way of evaluating of carbon for for sending and bleached alore sively used by the fill. Enclosure: As stated above 9 October 1956 Distribution 2 - COS, Marich w/enc 2 - COS, Garrany w/enc 1 - MITCHAS, Frankfurt w/enc 1 - Ri w/enc 1 - TES/SHB w/enc 1 - TES/SHB w/enc 2 - TES/SHB w/enc 2 - TES/SHB w/enc 3 - TES/SHB w/enc 4 - TES/SHB w/enc 5 - TES/SHB w/enc 6 - TES/SHB w/enc	DECLASSIFIED AND RELECTIONS OF TRAL INTELLIGENCE	ten:
b. The His carbon methods which have falled into the range of extremely good tion provided, we have no way of evaluating of earlood His for mending and bleached alore sively used by the His. Enclosure: I has stated above 9 October 1955 Distribution 2 - COS, Manich w/enc/ 2 - COS, Garmany w/enc/ 1 - His w/enc/ 1 - His w/enc/ 1 - His w/enc/ 1 - His w/enc/ 2 - His/SHB w/enc/ 1 - His/SHB w/enc/ 2 - His/SHB w/enc/ 1 - His/SHB w/enc/ 2 - His/SHB w/enc/ 2 - His/SHB w/enc/ 1 - His/SHB w/enc/ 2 - His/SHB w/enc/ 2 - His/SHB w/enc/	DECLASSIFIED AND RELECTIVE CENTRAL INTELLIGENCE SOURCES METHODS EXEMPT	ASE AG
b. The RIS carbon methods which have fallen into the range of extremaly good tion provided, we have no way of evaluating of carbon Si for sending and bleached alore sively med by the RIS. Enclosure: 1 As stated above 9 October 1956 Distribution 2 - COS, Manich w/enc/ 2 - COS, Garrany w/enc/ 1 - RI w/enc/	DECLASSIFIED AND RELE CENTRAL INTELLIGENCE SOURCES METHODS EXEMPT NAZI WAR CRIMES DISCLOS	ASE AG
b. The His carbon methods which have falled into the range of extremely good tion provided, we have no way of evaluating of earlood His for mending and bleached alore sively used by the His. Enclosure: I has stated above 9 October 1955 Distribution 2 - COS, Manich w/enc/ 2 - COS, Garmany w/enc/ 1 - His w/enc/ 1 - His w/enc/ 1 - His w/enc/ 1 - His w/enc/ 2 - His/SHB w/enc/ 1 - His/SHB w/enc/ 2 - His/SHB w/enc/ 1 - His/SHB w/enc/ 2 - His/SHB w/enc/ 2 - His/SHB w/enc/ 1 - His/SHB w/enc/ 2 - His/SHB w/enc/ 2 - His/SHB w/enc/	DECLASSIFIED AND RELECTIVE CENTRAL INTELLIGENCE SOURCES METHODS EXEMPT	ASE AG
